

7-in. Water Dragon™

The Water Dragon was designed to Impress!

From head to tail and with form and function this is one bass killer. The Water Dragon has more action and design features than a standard lizard. It will trick the wariest bass into striking. The head is designed with gills and gill filaments for a new look and extra gliding function on Carolina rigs. The body is filled with detail and contour to make a more realistic presentation, reflecting light in many directions while breaking up the image. We have also incorporated a lateral line that is easily adapted with a marker style pen for added color and a large flat spot on the tail.

The rear legs were designed larger than the front for more action – an action that teases fish to bite, especially in a nose down posture while Texas rigged.

The thickest part of the body is actually at the rear legs, this not only looks natural as larger muscles with the rear legs being bigger but also has two functions as well. The extra bulk in the rear allows the bait to be cast and pitched more accurately and provides additional flotation for Carolina rigs and Texas rigs. This bait literally waves at the fish on a Texas rig taunting them.

Everywhere you look the Water Dragon is different from any other lizard on the market.
